February 26, 2021

Goal

- Make the basic template for the presentation on the 5th of March.

Conclusion

- The presentation is made.
- Github was update it with all the documents available on Canvas and Whatsapp.

Problems

- Unfortunately, I have a limited amount of time the past 2 days to work on the project. I was quite busy with another project and a course and therefore I have delivered less compare to other SSAs.
- I have completely forgot to send the SSA on Thursday. Therefore, I have send it on Friday morning.

Follow up Steps

- Make some last adjustments to the presentation based on the feedback received from other team members, and prepare some full text to be presented on the 5th of March.

Work Division

- Prepared the presentation.
- Updated Github.

Time Division

- Prepare the presentation 3 hours
- Organize Github 1 hour
- Writing SSA: 1 hour

Overleaf Link

1 Presentation

The presentation is now fully made and it will be available on Github this afternoon. Any feedback on it from the team members or the tutor is really appreciated. Till the next SSA, I will work on making the last adjustments based on the feedback received. The presentation will be available on a folder called Presentations.

2 Github organization

I have added all the documents from Canvas also to Github. In order to allow a better workflow between all of us I think it will be better for each team member while he creates a new document to put it also on Github instead of just Whatsapp or Canvas.
